 Backed by a consistent top producing dam, this bull should go on to produce moderate birthweight calves that grow. Definitely a bull to consider keeping replacements out of.

 Nice bull that accomplishes plenty of good. Balanced EPDs and good actual numbers to validate his performance. His dam is consistent, good and fuss free. Comes from a maternal line with loads of stability. This bull is built to last and hold up under

 A really nice son of the widely used MAGS Cable. Deep bodied with lots of flank and softness to his side.

 Attractively put together with plenty of length of body and shape. Smooth shouldered and nice headed bull that comes from a consistent female line. Use to increase milk, level progeny from hooks to pins and add style to calves.

 The only PB Angus in the sale this year. He had no contemporaries to ratio against so all EPDs are hand calculated. A very well rounded bull that we think could make some good replacements.
